• Reduces tree growth up to 70% over three years including stem elongation and wood formation using Mastiff® PGR
• Relieves symptoms of iron chlorosis, manganese deficiency and drought and transplant stress using Nutriboosters®

Increase treatment effectiveness The Direct Inject process injects chemicals directly into the active zone delivering faster results.

Treat almost any tree in five minutes or less There is no waiting for uptake, no guarding, and no return trips. More trees treated in less time.

Prevent drilling damage Direct-Inject is the only trunk injection method that does not require drilling, preventing drilling damage, long-term wounding, and wasted tree energy.

Simplify the tree-care process The Direct-Inject System requires no power, no drills, and no pumps. Everything is included in one carrying case.
