**Fungus gnats larvae**

---

**Increase treatment effectiveness**
The Direct Inject process injects chemicals directly into the active zone delivering faster results.

**Treat almost any tree in five minutes or less** There is no waiting for uptake, no guarding, and no return trips. More trees treated in less time.

**Prevent drilling damage**
Direct-Inject is the only trunk injection method that does not require drilling, preventing drilling damage, long-term wounding, and wasted tree energy.

**Simplify the tree-care process**
The Direct-Inject System requires no power, no drills, and no pumps. Everything is included in one carrying case.
