A well-maintained landscape that includes healthy trees enhances the quality of your home. Tree Trunk Injections are a tree-friendly way to treat trees and are people friendly too. Children and pets are not exposed to chemical spray or open chemical containers. There is no need to cover outdoor toys, play equipment, pools, furniture or vehicles.

Treatments are available for Diplodia Tip Blight, Pine Wilt Disease, Emerald Ash Borer (EAB), Anthracnose, Crabapple Leaf Disease and other pests and diseases. Tree nutrients are available to relieve symptoms of iron chlorosis, manganese deficiency and drought and transplant stress.

- The Tree Trunk Injection process injects chemicals directly into the cambial zone delivering faster results
- There is no waiting for uptake, no guarding, and no return trips during the application
- The ArborSystems Direct-Inject trunk injection method does not require drilling, preventing drilling damage, long-term wounding and wasted tree energy.

Trees are a valuable asset to your home

Tree Trunk Injection uses less chemicals compared to foliage spray or soil drenching.

Simple and More Effective Tree-Care

- Delivers proven results
- Injects directly into trees limiting exposure
- Provides quick control
- Minimal risk as it is a closed system
- Made in USA
Use Tree Trunk Injections for Emerald Ash Borer

NO Chemical Spraying
NO Need to cover anything in your yard
NO Drilling which damages the tree

Untreated tree (left) is severely damaged by Emerald Ash Borers while treated tree (right) is healthy.
